GULF FINANCIAL POTENTIALS

Potential of working according to participation, sharing and ethical-Islamic criteria financial institutions and Finance Market Estimates \$3.4 Trillion by end of 2018. Finance assets represented 1% of the global financial market of \$127 Trillion in assets.

The Gulf countries have been trying to lead their assets to safe investments. Due to the economic stability in recent years, its trust, safety, in terms of investor protection and the business familiarity with Gulf countries, US has been a candidate to be the center of the investments of Gulf Countries.

The Gulf countries, carrying out very different investments in very different fields in the world are determining the most productive fields for every country and canalizing this field.

At a time where the International Monetary Fund warns that the global economy is sliding into "secular stagnation" due to a slump in commodity prices and a slowdown in investments, the Islamic economy stands in stark contrast, offering a viable solution to success in the 21st century.

Despite that global Islamic finance industry is projected to grow by 60% to \$3.2 trillion in assets by 2020

The Gulf countries are using different instruments such as investment trusts, private equity, and sukuk for investment in the countries they have a tendency.

The most popular of these methods is now Sukuk.

The World Countries have been undertaking government based enterprises to attract this rich and economic source. For instance, holding 57% of all Gulf funds, Malaysia has leased the council's field using the Gulf oriented sukuk it has exported.

The fund transferred via sukuk method to the country from Gulf Countries can be used in many areas. Lands, real estates, energy investments, vehicles, factories, workshops, industrial zones are the assets mostly used for sukuk export.

The positive development is the appeal of Sukuk as an alternative source of financing from new jurisdictions ranging from Europe, Asia, CIS and Africa and emerging sign of possible direct entry from North America.

ISLAMIC- ETHIC FINANCIAL INSTRUMENTS

**GULF-USA
CAPITAL**

US SHARE FUND

Invest

Potential of working according to participation, sharing and ethical criteria financial institutions and Finance Market Estimates \$3.4 Trillion by end of 2018. Finance assets represented 1% of the global financial market of \$127 Trillion in assets.

Alternative-ethic-safe-profitable financial instruments is a centuries-old practice that is gaining recognition throughout the world and whose ethical nature is even drawing the interest of all investors.

Big potential finance investors have been trying to lead their assets to safe investments.

It is important to note that there is a need for a more efficient and cost-effective way to increase the profitability of the finance and loan market.

The US Share Fund operates in accordance with the principles of interest-free financial model as a participation fund, with bonds and profit sharing accounts, and lending such funds through production support, finance lease and profit/loss sharing partnership.

Our financial models is based on four core principles: Prohibiting usury-Avoiding speculation-Avoiding gambling-Investing ethically

Although our in the financial models have many products similar to those offered by conventional banks, the two entities differ conceptually. One key difference is that conventional banks earn their money by charging interest and fees for services, whereas our in the financial models earn their money by profit and loss sharing, trading, leasing, charging fees for services rendered, and using other share contracts of exchange.

Our partner financial institutions must comply with a variety of ethic principles besides avoiding interest.

Our Fund has a wholly-owned subsidiary that generates leasing/rental income by leasing assets back to the originating company which were taken over from the originating company.

In the our mortgage system, rather than lending a customer money to buy a house, the bank will buy the house itself. The customer can then either buy the house back from the bank at an agreed-upon, above-market value paid in instalments (this is called murabahah) or he can make monthly payments comprising a rental fee and a piece of the purchase price until he owns the home outright (ijara).

GULF US CAPITAL

The GCC (Gulf countries) are situated on the richest area of the world in terms of petrol and energy reserves and have 2.5 trillion dollars of fund source. The Gulf countries have been spending 1.8 trillion dollars of these funds for overseas investments.

Owning 35% of total fund sources of the world, the Gulf countries have been working with different instruments than western-sourced investments. The Gulf countries composing of the countries such as Qatar, Oman, Bahrain, United Arab Emirates, Saudi Arabia and Kuwait have preferred interest free instruments while investing.

The Gulf countries have been trying to lead their assets to safe investments. Due to the economic stability in recent years, its trust, safety, in terms of investor protection and the business familiarity with gulf countries, US has been a candidate to be the center of the investments of Gulf Countries.

Potential of working according to participation, sharing and ethical criteria free of interest financial institutions and Islamic Finance Market Estimates \$3.4 Trillion by end of 2019.

Despite that global free of interest finance industry is projected to grow by 60% to \$3.2 trillion in assets by 2020

Alternative-ethic-safe-profitable Islamic financial instruments is a centuries-old practice that is gaining recognition throughout the world and whose ethical nature is even drawing the interest of all investors.

GULF-US Platform

The Gulf countries have been trying to lead their assets to safe investments. Due to the economic stability in recent years, its trust, safety, in terms of investor protection and the business familiarity with Gulf countries, US has been a candidate to be the center of the investments of Gulf Countries.

The US government is constantly working to improve the US tax system, legal and fiscal environment, political and economic stability and regulatory framework in order to attract financial investments.

The US and the Gulf countries remain confident of evolving the growing mutual relationship and will continue contributing significantly to the development of trade and economic relations between both parties

In order to develop joint projects and collaborations in **economic sectors-financial-commercial-scientific-industrial-technological-educational-cultural-tourism, real estate and other industrial and service areas** between **Gulf Cooperation Council (GCC) countries' investors and US entrepreneurs**, state and local and private institutions, investors, and among people who want to develop business, **Gulf US Platform** has been operating since **2008**.

The platform will serve with financial settlement methods of **3.5 trillion dollars** Gulf funds which are valid in USA, and international area.

Liaison offices and network are available in the US and the Gulf (Saudi Arabia, United Arab Emirates, Qatar, Bahrain, Oman) countries. With its **2000 Gulf funds**-financed and investors portfolio, has provided financial services for holding companies in the US, investor companies, local governments, Chambers of Commerce, Development Agencies, intermediary financial institutions.
